TheraTogs ULTRA
Lower Extremity System

The TheraTogs ULTRA Lower Extremity System is designed to address several alignment and functional deviations of the knee joints, developing femurs, and hip joints in an independently ambulatory child, and in an ambulatory adult with no problems related to hip or trunk stability.

The Lower Extremity System is an effective intervention for the management of neuromotor, balance and gait disorders caused by a wide range of diagnoses, including:

- Cerebral palsy
- Hypotonia
- Ligament laxity
- Hemiplegia due to stroke or TBI

How to Order

TheraTogs are carried by leading distributors in the physical rehabilitation field all over the globe. For distributor names and contact links, see www.theratogs.com/buy

(US only) TheraTogs may be ordered through your preferred orthotist or O&P clinic, particularly if reimbursement is a requirement. See www.theratogs.com/prolook for a list of Providers in your area.

What Does GoldTone™ Mean?

GoldTone™ is a superior knitted material that is specifically formulated for the demands of biomechanical retraining. Scientifically engineered to support the best outcomes possible from your TheraTogs application, GoldTone is manufactured with a patented fabric finishing process and is used only for TheraTogs ULTRA systems.

About TheraTogs

TheraTogs™ are FDA Class I medical devices intended to be issued by, and applied under the supervision of, a licensed healthcare practitioner engaged in neuromotor or sensorimotor retraining. TheraTogs ULTRA systems are made of GoldTone™ - a proprietary and patented Latex®-free composite fabric with a unique foam backing made of an aqueous-based elastomeric urethane. TogRite™ strapping is Latex-free, elastomeric strapping with an inert, silicone-based grip surface.
