

TheraTogs ULTRA Wrist & Thumb Positioning System

If you can correct wrist and thumb alignment with your hands, without force, you can use the TheraTogs ULTRA Wrist & Thumb System to carry over that correction - positioning your client's day-long activities in corrected functional alignment.

No other wrist or hand support product offers the adaptability, flexibility, and patient comfort of this TheraTogs system.

The **Wrist & Thumb Positioning System** is the most versatile and flexible system of its kind. Prescribe it as a stand-alone functional alignment aide, or use it to extend a TheraTogs strapping application from the shoulder or elbow to the hand.

Made of the same foam-backed GoldTone materials as our TheraTogs ULTRA garments, the Wrist & Thumb Positioning System is both comfortable and effective in supporting and maintaining the joint position gains available with manual correction.

If your client has these indications...	A Wrist & Thumb System can be used to...
Flexible wrist-flexed posture, wrist or carpometacarpal joint instability, or soft tissue extensibility at wrist or thumb	Improve wrist and thumb stability
Palmar arch modulation deficits (post hemiparesis, post-stroke, cerebral palsy)	Restore the palmar arch
Increased ulnar deviation at the wrist	Reduce flexible ulnar deviation
Proximal limb joint control deficits	Assist in reducing forearm pronation or supination, elbow flexion or extension
Soft tissue extensibility at thumb and wrist	Relieve pain associated with mal-alignment

System Benefits

- ✓ Versatility unmatched by other wrist products - apply exactly the pronation or supination force vectors your client needs - and change them as he/she improves!
- ✓ Extend wrist control to a TheraTogs system worn for the arm, shoulder, or trunk.
- ✓ Wrist system made of GoldTone fabric grips, dynamically repositions, and retains the neuromotor system - much better for outcomes than a hard brace or a compression wristlet.

Model Sizes

PEDIATRIC Model No.	Description
#GWT 307R #GWT 307L	Small Pediatric Right Hand / Left Hand
#GWT 317R #GWT 317L	Medium/Large Pediatric Right Hand / Left Hand

How to Order

- ✓ TheraTogs are carried by leading distributors in the physical rehabilitation field all over the globe. For distributor names and contact links, see www.theratogs.com/buy
- ✓ (US only) TheraTogs may be ordered through your preferred orthotist or O&P clinic, particularly if reimbursement is a requirement. See www.theratogs.com/prolook for a list of Providers in your area.

<p>What Does <i>Made with</i> GOLDTONE™ Mean?</p>	<p>GoldTone™ is a superior knitted material that is specifically formulated for the demands of biomechanical retraining. Scientifically engineered to support the best outcomes possible from your TheraTogs application, GoldTone is manufactured with a patented fabric finishing process and is used only for TheraTogs ULTRA systems.</p>

About TheraTogs

TheraTogs™ are FDA Class I medical devices intended to be issued by, and applied under the supervision of, a licensed healthcare practitioner engaged in neuromotor or sensorimotor retraining. TheraTogs ULTRA systems are made of GoldTone™ - a proprietary and patented Latex®-free composite fabric with a unique foam backing made of an aqueous-based elastomeric urethane. TogRite™ strapping is Latex-free, elastomeric strapping with an inert, silicone-based grip surface.
