

Client Selection Guidelines

The new TherAlign Dragonfly™ TLSO system combines three outstanding clinical components into one solution for flexible postural deficits:

- A comfortable, foam-lined, Velcro-sensitive TheraTogs garment system that grips the skin. The patented composite fabric is elasticized with a stretch bias that favors postural alignment.
- A customizable TheraTogs Dragonfly™ orthotic component that attaches quickly and easily to the base garment and strapping system for full-trunk support.
- A set of strong, TogRite™ grip-lined elastic straps that operate like muscles to improve alignment and correct neuromotor function at targeted sites.

TherAlign Dragonfly TLSO = A New Generation of Orthoses

If your client has ...

The Dragonfly TLSO system can:

Hypotonia	✓ Improve postural alignment and spinal positioning for function.
Flexible kyphosis	✓ Shorten and re-train trunk extensor muscles.
Flexible lordosis	✓ Limit trunk movement in the sagittal plane.
Excess pelvic tilt	✓ Improve respiratory capacity by reducing flexible kyphosis.
Diminished pelvic tilt	✓ Reduce postural deviations between thorax and pelvis.
Weak trunk muscles	✓ Reduce pressure on intervertebral disks via intracavitary pressure.
Shoulder protraction	✓ Retract forward shoulders.
Scapular winging	✓ Gently stabilize the scapula on the thorax.
	✓ Provide lightweight unobtrusive trunk support while worn under client's clothing.

Sizing & Ordering

Sizing a TherAlign Dragonfly is a four-step process:

1. Take proper measurements as outlined in the TherAlign Sizing Chart.
2. Select the proper size for the TheraTogs garment system component.
3. Select the proper Dragonfly unit corresponding to spinal measurements.
4. Select rib and pelvic strapping length.
