

Ankle Dorsiflexion Assist (DFA) Systems

The Ankle Dorsiflexion Assist (DFA) System addresses **calf muscle contracture - or the potential to develop a contracture** - in the presence of the following problems and diagnoses:

- Cerebral palsy
- Traumatic Brain Injury – acute, post-acute, and chronic phases
- Hemiplegia due to Stroke – acute, post-acute, and chronic phases
- Multiple Sclerosis
- Congenital Equinus Deformity
- Plantar fasciitis
- Toe Walking
- Talipes Equinovarus (flexible type)

Choose the system(s) you need to meet your client's needs...

GAIT TRAINER SYSTEM

The Gait Trainer can be configured for either in-shoe or outside-of-shoe wear. The TogRite Cross Strap both mimics and assists the muscles that dorsiflex the ankle both eccentrically at weight assumption and concentrically in the swing phase of gait.

Gait Trainer In Shoe

Gait Trainer Over Shoe

- Simplicity
- Support (don't supplant) – dynamic ankle motion
- Extra clinical hands
- Progressive application to accommodate changes
- Preview orthotic design

SLEEP SYSTEM

Reduce or prevent calf contractures with a comfortable, sleep-friendly system that provides low-load, prolonged elongation to shortened calf muscle and soft tissues while protecting the midtarsal joint from strain.

Sleep System

- Midfoot Joint Support Split Strap
- Supination or Pronation Support
- Forefoot DF Strap
- 5-pronged DF Split Strap

...Or order the **Combination package** that includes both the Gait Trainer and Sleeping systems, for 24-hour therapy!
