

# TogRite Strapping

TogRite is a dynamic strapping material with resisted elongation and strong, elastic rebound properties that uniquely replicates functioning muscle – known to users as “muscle by the yard.”

---

*Think of TogRite as a combination of an Ace® elastic wrap and Kinesio® kinesiology tape – offering the best features of both.*

---

An essential component included in nearly all TheraTogs garment systems, TogRite is now also available as a separate supply item. Sold in 1-yard, 10-yard, and 25-yard rolls, TogRite serves 100’s of clinical uses, anywhere you need to hold, gather, fasten or fix items together. (It’s handy to have at home or in the workshop, too!)

## Key Benefits

- Combines best features of an elastic wrap with the fluid-pumping attributes of kinesiology tape.
- TogRite strapping material is low-profile, durable, and washable.
- The elasticized silicone backing grips the body and/or garment surface to resist migration during wear and movement.
- The exterior loop surface allows for instant attachment and unlimited adjustment, using the hook tabs provided.
- Grip and strap anything with a simple hook tab closure.

TogRite’s superior rebound and recovery properties are field-proven and laboratory-tested, with no “stretch out” or loss of recoil strength and resistance to stretch – even after repeated use and multiple machine washings.

---

*We’ve seen the same straps used daily for more than 6 months with no loss of elastic vigor or grip.*

---

## Indications and Applications

As “muscle by the yard”, TogRite will enhance the effects of TheraTogs systems, or allow the clinician to preview the effects of comparable splints or orthoses, with applications designed to foster:

- Pelvic stabilization in sitting
- Postural alignment
- Pelvic rotation
- Scapular and shoulder retraction
- Abdominal assist
- Hip motion assist
- Knee flexion or extension assist (swing phase)
- Ankle dorsiflexion assist

## Key Features

- Consistent stretch & rebound
- Strong elasticity & resistance to stretch
- Securely embedded, elasticized silicone grip lining
- Durability
- Versatility
- Machine washable (air dry)
- Packaged in rolls for custom sizing and fitting, with multiple tabs included.

## Sizing

TogRite is available in the following lengths and widths. Each SKU comes with an ample supply of tabs.

SKU	Dimensions	SKU	Dimensions	SKU	Dimensions
<b>TR103</b>	1.5" x 3 yard roll	<b>TR203</b>	2" x 3 yard roll	<b>TR303</b>	3" x 3 yard roll
<b>TR110</b>	1.5" x 10 yard roll	<b>TR210</b>	2" x 10 yard roll	<b>TR310</b>	3" x 10 yard roll
<b>TR125</b>	1.5" x 25 yard spool	<b>TR225</b>	2" x 25 yard spool	<b>TR325</b>	3" x 25 yard spool

TogRite strapping is elastomeric strapping with an inert, silicone-based grip surface. All materials and components of TheraTogs™ orthotic garment systems and TogRite strapping are made and packaged without latex.
