

Colorful Options from TheraTogs

February 1, 2026

Material and color updates from TheraTogs:

- **The much-beloved "old" material is back** - featuring a softer foam layer with more grip, and a time-tested UBL (loop) surface that engages well with our current hook tabs (1300 cycles and counting).
- **The updated fabric used across TheraTogs systems** has slightly more stretch, which allows for a snug, comfortable fit and excellent grip once applied. As with all TheraTogs garments, optimal fit may benefit from final adjustment after initial wear. Trimming excess material as needed is both expected and consistent with long-standing clinical practice; this is not a change in performance expectations, and the 6-month warranty policy remains in place.

For reference, our short video on trimming and fit optimization can be found here:

www.theratogs.com/trimit. Feel free to share this link with your sales team, customers, and caregivers.

- **Effective February 1, 2026**, all TheraTogs systems will be available in these colors (cute baby not included):

Gold (GL)

Royal Blue (RB)

(As of this writing, there is still some back stock in Teal that can be provided by special order.)

Be sure to indicate your color choice when placing your order via your local orthotist, one of our catalog partners, or your online Professional Account.

All components contained in any SKU will be made of a single color of fabric. Special requests for mixed-color SKUs will be considered as needed.
